

BLV Series R Type

24 VDC Input 400 W-Compatible Drivers **NEW**

24 VDC Input 400 W
Power Supply Cable **NEW**

Allows for system unification of battery power supply and sensor, etc. to 24 VDC.
Contributes to overall space saving and cost reduction of equipment.

Addition of Support for 24 VDC Input 400 W

24 VDC input 400 W-compatible drivers are now available.

Power Supply Voltage	Motor Output Power			
	60 W	100 W	200 W	400 W
24 VDC	●	●	●	New!
48 VDC	●	●	●	●

Motors and connection cables are common with the 400 W version

Drivers and power supply cables are new

Unified 24 VDC Control and Power Supply

1. Unified 24 VDC

The systems that comprise automated transportation robots, such as battery power supply and sensors, can be unified to 24 VDC.

2. Space Saving/Equipment Weight Reduction

For a 48 VDC system, four 12 VDC batteries are needed, while just two can be used for a 24 VDC system.

This contributes to space saving and weight reduction of the equipment.

3. Cost Reduction

This allows for a reduction in the number of battery power supplies, which helps reduce costs.

Ideal for Driving Automated Transportation Robots

1. Stable Operation from 1 r/min

- Broad speed control range of 1 - 4000 r/min. Stable operation is possible even at low speeds.
- Acceleration and deceleration time can be set from 1 ms to enable smoother velocity compensation.

2. Acquisition of Current Position

- The current position can be acquired with enhanced motor feedback information.
- Improved resolution allows the motor to stop at the target position.

3. Wider Range of Operating Voltages

A wider range of operating voltage supports real world battery use.

Product Line

◇24 VDC 400 W-Compatible

Product Name

BLVD-KBRD

◇24 VDC 400 W Power Supply Cable

Product Name

LC02D06B

Specifications

Rated Output Power		400 W
Power Supply Input	Rated Voltage	24 VDC
	Permissible Voltage Range	15 - 40 VDC
	Rated Input Current	20 A
	Max. Input Current	31 A
Rated Torque		1.27 Nm
Maximum Instantaneous Torque		2.54 Nm
Rated Speed		3000 r/min
Speed Control Range		1 - 4000 r/min

Modbus (RTU) **CANopen**

●Speed – Torque Characteristics

● is the region with a time rating of 30 minutes. Operation for more than 30 minutes may be possible depending on the ambient temperature and heat radiation conditions.

Dimensions (Unit = mm)

Product Name	Mass [kg]
BLVD-KBRD	0.46

Product Name
